

HIGH PERFORMANCE LIVE TOOLS

TURN YOUR LATHE INTO A MILLING MACHINE!

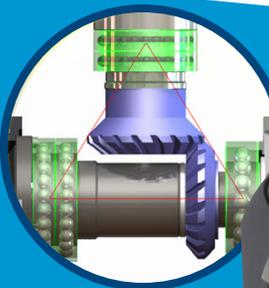

WHAT MAKES OUR LIVE TOOLS UNIQUE?

- Nickel Chrome Molybdenum body
- Ground features to ensure optimal concentricity
- ABEC 7 angular contact bearings for highest run-out precision
- Run-out guarantee of under 5 micron repeatability at collet nose

DESIGN & ENGINEERING

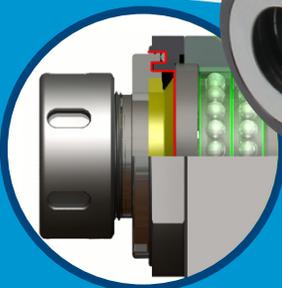

GEARS FOR STABILITY

- Hand-matched gears for minimal backlash
- Spiral bevel gears maximizes drive torque
- Optimal bearing placement for balanced torque stress

PROTECTIVE SEALS

- Labyrinth Seals with unique multi-barrier construction prevent contaminants from entering the main chamber
- Live and Static tools offered in coolant through, adjustable, and multi-output

'ICE' FEATURE ALLOWS
INTERNAL COOLANT
LIVE TOOLS TO BE RAN
DRY CONTINUOUSLY!
